Professional Summary

Analytics and data professional with 6+ years of experience delivering data engineering, business intelligence, cloud application, and data science solutions. Skilled in Python, SQL Server, Power BI, Azure, ETL, dimensional modeling, REST APIs, and automation, with experience supporting healthcare, investment management, and oil and gas organizations.

Education

The University of Oklahoma <i>M.Sc. Data Science, GPA: 3.7</i> Graduated: May 2024	Norman, OK 2022–2024
Universidad Industrial de Santander <i>B.Sc. Petroleum Engineering, GPA: 3.7</i> Graduated: Nov 2019	Bucaramanga, Colombia 2015–2019

Work Experience

Standards IT <i>Analytics Administrator</i> ○ Delivered end-to-end reporting and data science solutions for healthcare, investment management, and oil and gas clients by designing SQL Server data warehouses, ETL pipelines, dimensional models, and Power BI semantic models. ○ Reduced development effort and external service costs by building custom Python applications, REST APIs, and automated integrations using FastAPI, React, Angular, and SQL Server. ○ Accelerated cloud application delivery by deploying scalable solutions with Azure App Services, Azure Functions, Azure SQL, Docker, and Azure container services.	Oklahoma City, OK Sep 2024–Present
The University of Oklahoma <i>Research Assistant</i> ○ Increased project efficiency by 15% by coordinating stakeholders and supporting collaboration between the University of Oklahoma and UNSA research teams. ○ Improved healthcare data availability by building ETL and web scraping pipelines in Python and SQL to collect, clean, transform, and integrate datasets from Peru and the United States. ○ Improved response time by 30% by developing predictive and prescriptive healthcare tools using Python and PyTorch.	Norman, OK Jan 2023–May 2024
PCI Energy Solutions <i>Software Analyst Intern</i> ○ Improved data retrieval efficiency by 15% by developing Java data structures and managing SQL database components for PCI Kube. ○ Improved software reliability and delivery by creating local API testing workflows with Java and Postman while managing defects and source control through Jira and Git.	Norman, OK May 2023–Aug 2023
QAQC Services <i>Data Analyst</i> ○ Improved forecasting accuracy, reduced non-productive time, and increased operational visibility by analyzing oil and gas data with Python, SQL, and Spotfire.	Bogota, Colombia Jan 2019–Aug 2022

Entrepreneurship

Thinkbig <i>Founder</i> ○ Grew the agency for seven years by delivering data-driven marketing strategies that generated an average 30% ROI for clients.	Bogota, Colombia 2017–2024
